

The Township of

Rideau Lakes

**Playground Equipment for Ronald E
Holman Complex - ADDENDUM #2**

A2-PW2026-21

This addendum is being released to answer questions received on this RFP.

Please see questions received and responses noted below.

1. Q: Would the municipality be amenable to installation without curbs, planning EWF to be level with surrounding grade?

A: Curbs are required to hold proposed fall protection material, if curb proven not required to hold material type in place is acceptable.

2. Q: Is the municipality flexible as to the type of acceptable curbs? Concrete, for example, is not a cost-effective option.

A: Yes.

3. Q: Would the municipality be receptive to proponents submitting multiple design options? If yes, please clarify whether they may be included within the same bid package or should be submitted separately.

A: Equipment options are acceptable that are within budget, however for the purpose of evaluations, proponents should keep options in same budget range.
